| 1 | Introduction to MS Word: MS Word: Documents -Opening & Saving files, Ed Inserting, Deleting, Cut, Copy, Paster Search, Replace, Formatting page Converting files to different formats, Indocuments, Sending files to others, Using Icons, using help, Formatting Documents, Font selection- style, size, color of Italic, Underline, Case settings, Highlight Setting Paragraph style, Alignments, Margins, Bullets & Numbering. Setting Page, Page tab, Margins, Layout settings Shading, Columns, Header & footer, Setting Page, Page tab, Margins, Layout settings Shading, Columns, Header & footer, Setting Page Numbering, Gate & Time, Author Documents, Web page. Creating Taborders, Alignments, Insertion, deletion Sorting, and Formula, Drawing Pictures/Files etc., Tools — Word Com Mail merge, Templates, creating content Letter/Faxes, Creating Web pages, Using Changes, Security, Digital Signature. Files | liting tex, , Undo, & setti mporting sing Too uments - etc., Type ting, Spe Indents, rage style c, Paper t ting Foo al page b frames, ole of Coo etc., Cre bles- Ta n, Merg Inserting pletion, ats for bo ing Wiza | t docume Redo, F ng Marg & Expor I bars, Ru - Setting F e face - B ecial symb Line Spa e - Format ray, Borde tnotes & reak, Colu , Anchorin ntents, Inde eating Ma able setti ing, Splitt g Clip A Spell Che boks, Crea rds, Track | nts, ind, gins, ting aler, told, ools, etc, ting er & end er & dex, ster ngs, arts, cks, ting king king | 15 | CO1 |

| 2 | Introduction to MS Excel: MS Excel: Spread Sheet & its Applications, Opening Spreadsheet, Menus - main menu, Formula Editing, Formatting, Toolbars, Using Icons, Using help, Shortcuts, Spreadsheet types. Working with Spreadsheets- opening, saving files, setting Margins, converting files to different formats (importing, exporting, sending files to others), Spread sheet addressing - Rows, Columns & Cells, Referring Cells & Selecting Cells - Shortcut Keys. Entering & Deleting Data- Entering data, Cut, Copy, Paste, Undo, Redo, Filling Continuous rows, columns, Highlighting values, Find, Search & replace, Inserting Data, Insert Cells, Column, rows & sheets, Symbols, Data from external files, Frames, Clipart, Pictures, Files etc, Inserting Functions, Manual breaks, Setting Formula - finding total in a column or row, Mathematical operations (Addition, Subtraction, Multiplication, Division, Exponentiation), Using other Formulae. Formatting Spreadsheets- Labelling columns & rows, Formatting- Cell, row, column & Sheet, Category - Alignment, Font, Border & Shading, Hiding/ Locking Cells, Anchoring objects, Formatting layout for Graphics, Clipart etc., Worksheet Row & Column Headers, Sheet Name, Row height & Column width, Visibility - Row, Column, Sheet, Security, Sheet Formatting & style, Sheet background, Color etc., Borders & Shading - Shortcut keys. Working with sheets - Sorting, Filtering, Validation, Consolidation, and Subtotal. Creating Charts - Drawing. Printing. Using Tools - Error checking, Spell Checks, Formula Auditing, Creating & Using Templates, Pivot Tables, Tracking Changes, Security, Customization. | 15 | CO2 |
|---|---|----|-----|
| 3 | Introduction MS Power Point: MS Power point: Introduction to presentation — Opening new presentation, Different presentation templates, setting backgrounds, Selecting presentation layouts. Creating a presentation — Setting Presentation style, Adding text to the Presentation. Formatting a Presentation — Adding style, Color, gradient fills, arranging objects, Adding Header & Footer, Slide Background, Slide layout. Adding Graphics to the Presentation—Inserting pictures, movies, tables etc. into presentation, Drawing Pictures using Draw. Adding Effects to the Presentation—Setting Animation & transition effect. Printing Handouts, Generating Standalone Presentation viewer. | 15 | CO3 |
| 4 | MS Access: Introduction, planning a Database, Starting Access, Access Screen, creating a New Database, Creating Tables, Working with Forms, creating queries, Finding Information in Databases, Creating Reports, Types of Reports, | 15 | CO4 |

| Course Type | DSC | L | Т | ı | Р | Credit |
| Pre-Requisite | | 3 | 1 | (| 0 | 4 |
| Course Objectives | To introduce basic elements of comm techniques and devices used to transr different devices. To introduce the func Understand different protocols and net | nit data k tions of d | oetween o ifferent la | distan yers (| t locations | through |
| Course Outcom | es | | | | | |
| CO1 | To describe and analyze the hardware communication network. | | | | | |
| CO2 | Able to explain networking protocols relationship. Compare reference mod particular design. | els and s | elect app | ropri | ate protoc | ols for a |
| CO3 | Able to classify networks, transferring performance, and understanding conce | pts of da | ta connec | tion a | and transfe | r. |
| CO4 | Able to Identify infrastructure compon infrastructure including devices, to management and security. | | | | • | _ |
| Module | Course Contents | | | | Contact Hrs. | Mapped CO |
| 1 | Introduction to Data Communication System: Data, Signaling System; Synchronous and Asynchronous and Asynchronous and Asynchronous and Asynchronous and Asynchronous and Parameters and Full Duplex Transmission; Guided and Unguided. Introduction to Definition; Goals and Application of Types of Networks: Point to point, Introduction to Topologies (PAN, LAN, MAN, WAN), Ce and Collaborative; Type of Data Conwired and Wireless communication. | ng and Tonous Trallel; Sin Transmis Compute Compute Multipoin ntralized, | ransmission mplex, Hission med er Networder Networder, Types Distributer | on on; alf ia: rk: of ed | 15 | CO1 |
| 2 | Introduction to Network Connection Internet, Intranet, Extranet, VPNS; Book Channel Capacity: Nyquist Capacity are Formula. Network Architecture: Model Approach; Design Issues of Layered Interfaces, Standards and Protocols; Model and TCP/IP Model; Multiplexing WDM; Switching: Circuit, Message, Panarrowband and Broadband. Subnarrowband and Broadband. Subnarrowband and Broadband. Subnarrowband Extra Bervices: Repeaters and Switch, Router, Gateway. Physical Lesevices, Protocols. | andwidth nd Shann nolithic v approac ISO- OS g: SDM, acket; PS et Com ost Com Regener | n, Band and on Capacolors Layer h; Service I Referen FDM, TDI TN & ISD munication attors, Hu | nd ity ed es, ce M, N: on; ib, | 15 | CO2 |

| 3 | Data Link Layer: Framing, Error Control-VRC, LRC, CRC, Checksum, Flow Control- Hamming Code; LLC and MAC Sublayer; DLL Protocols: Stop-and-wait Protocol, Sliding Window Protocols, Go-Back-N protocol; LAN Protocols: IEEE protocol; Frame Relay; Cell Relay and ATM. Network Layer: Routing, Congestion Control, QoS, Internetworking; Routing Algorithms: Distance Vector Routing, Link State; IP Addressing: IPV4 & IPV6, Firewalls, Frame Relay; Cell Relay and ATM. | 15 | CO3 |
|---|---|----|-----|
| | Transport Layer: Connection Management, Multiplexing, Segmentation and Reassembly Host- to-Host Flow Control, Acknowledge and Error Control; Transport Protocol: Connection-oriented TCP and Connection-less UDP. | | |
| 4 | Session Layer Logical Session Management, QoS, Token Management; Synchronization; Event Management; Exception Handling. Presentation Layer: Data Presentation, Compression and Encryption; Data Compression: Text, Image, Audio and Video; Cryptography; Symmetric and Asymmetric Encryption; Private Key and Public Key Encryption. Application Layer: HTTP, HTTPS, Internet Browser, FTP, Telnet, DNS, Email System. | 15 | CO4 |

FOURTH SEMESTER

| Program | Bachelor of Computer Applications | | | | | | |
|---------------|--|--|---|---|-------------|---------|--------------|
| Year | II | Semo | ester | IV | | | |
| Course Name | Python Programming | | | ı | | | |
| Code | BCAN14201 | | | | | | |
| Course Type | DSC | L | Т | ı | Р | (| Credit |
| Pre-Requisite | | 3 | 1 | (| 0 | | 4 |
| Course | This subject provides in-depth knowle | edge of o | developin | g an | d deb | uggir | ng Python |
| Objectives | Programs using core data structures like | Lists, Dict | tionaries, | Tuple | es, and | l Strii | ngs as well |
| | as understand the concept of functions, | modules | and Numl | Py Lib | rary. | | |
| Course Outcom | es | | | | | | |
| CO1 | To Acquire programming skills in core Py | thon usin/ | g various | progi | rammi | ng co | onstructs |
| CO2 | To Implement Python programs using fu | ınctions aı | nd strings. | • | | | |
| CO3 | To Implement methods to create and m | | lists, tupl | es, an | nd dicti | ionar | ies. |
| CO4 | For Implementation of Python Library: N | lumPy. | | | | | |
| Module | Course Contents | | | | Cont Hrs | | Mapped CO |
| 1 | Overview of programming: structure elements of python; Introduction interpreter, using python as calculated indentation. Atoms, identifiers and literals, strings, operators, Creating python and output statements; control structure in the statement of the statem | to pythulator, pkeywords ython protatements function execution | hon: python s , Comme ograms: in (branch n, differe d excepti n, alterna | thon hell, ents, nput ning, ence ons; | 15 | | CO1 |
| 2 | Conditional and Looping Construct, statement and nested if — else whi function in for, Nested loops, break, con Use of compound expression in continuous Module(Importing entire module or strom statement), Functions from math module, Defining and invoking functionser defined function, default argument (default parameter values, keyword variables, void functions and functions research.) | le, for, untinue, pa onditiona selected of , random, ons: Built its, passin argument | use of rass statem I construobjects u time & construct I funct g parame | ent, icts; sing date tion, ters | 15 | | CO2 |

| 3 | Strings: Introduction to String, working with Text, Creating Strings of Characters, Using Special Characters in Strings, creating a Multiline String, String functions concepts & their use; String operators: +, *, in, not in, range, indexing, slicing; String built-in functions & methods: len, capitalize, find, isalnum, isalpha, isdigit, lower, islower, isupper, upper, Istrip, rstrip, isspace, istitle, partition, replace, join, split, count, decode, encode, swap case, Strings constants; Lists, Tuples: Concept of mutable lists, creating, initializing and accessing the elements of list, List operations (Concatenation, Repetition, Membership, slicing); List comprehensions, List functions & methods: len, insert, append, extend, sort, remove, reverse, pop, Immutable concept, creating, initializing and accessing the elements in a tuple; Tuple functions. | 15 | CO3 |
|---|---|----|-----|
| 4 | Sets and Dictionaries: Concept of Sets, creating, initializing and accessing the elements of sets, Concept of key-value pair, creating, initializing and accessing the elements in a dictionary, Traversing, appending, updating and deleting elements;Introduction of NumPy: Installing NumPy, Array creation and printing Array ndim, shape, size, dtype, itemsize and data. | 15 | CO4 |

| Course Objectives | Understand the fundamentals of Humar preferences through user research, d usable, efficient, and satisfying for user patterns, and visual design. Explore computer interaction, student to think c and evaluate interactive technologies | esign pri rs. The sk emergin | nciples of ills to des g trends | interact ign user i and tec | ive systems interfaces, ir hnologies i | that are nteraction n Human |
| Course Outcome | es | | | | | |
| CO1 | To understand and analyze the common the appropriateness of individual metho | | | | ed design pro | ocess and |
| CO2 | To apply, adapt and extend classic design | | | | | |
| CO3 | To employ selected design methods competence. Build prototypes at vary functional, interactive prototypes. | ing level | s of fideli | ty, from | paper proto | types to |
| CO4 | To demonstrate sufficient theory o methodology and inferential statistics literature in interface technology and de | to eng | | | temporary | research |
| Module | Course Conter | nts | | | Contact Hrs. | Mapped CO |
| 1 | Introduction: Importance of user Interform of good design. Benefits of good design design. The graphical user interface concept of direct manipulation: graphi Web user, Interface popularity, Principle | n. A brief popula cal syster | history or rity of g m, Charact | f Screen graphics; teristics, | 15 | CO1 |
| 2 | Design process: Human interaction with human characteristics human conside speeds, understanding business junc Design goals, Screen planning and pelements, ordering of screen data and and flow, | ration, H ctions. S o urpose, o | uman int creen De organizing | eraction esigning: screen | 15 | CO2 |
| 3 | Visually pleasing composition: amount emphasis, presentation information information retrieval on web, statistic consideration in interface design. Wind schemes selection of window, selectic screen-based controls. Components, teleincreases multimedia, colors, uses problem. | simply a cal graphi dows: Ne on of de xt and me | nd mean ics, Techr w and Na evices bas essages, Ic | ingfully, nological vigation sed and cons and | 15 | CO3 |
| 4 | HCI in the software process: The soft engineering, Iterative design, and prototyping in practice design rationale support usability standards; Golden rule Evaluation techniques: Goals of evaluexpert analysis, Evaluation through user evaluation method. Universal design, Uniteraction | rototypin ; Design r es; heuri : uation, Ev participa | g Design rules; princ stics HCI praluation ation, Cho | ; Focus ciples to catterns through osing an | 15 | CO4 |

| Code | BCAN18402 | | | | | | | | | | | | |
| CourseType | DSC | L | T | | P Credit | | | | | | | | |
| Pre-Requisite | | 3 | 1 | | 0 | 4 | | | | | | | |
| Course Objectives | This course introduces the student to the basics of Intellectual Property Rights, Copy Right Laws, Trade Marks and Issues related to Patents. The overall idea of the course to help and encourage the student for startups and innovations. | | | | | | | | | | | | |
| Course Outcom | | | | | | | | | | | | | |
| CO1 | To understand the need of intellectual pro | | | | | | | | | | | | |
| CO2 | To understand the concepts Patent and C | | | | | | | | | | | | |
| CO3 | To understand the concept of Trade Mark | | | | | | | | | | | | |
| CO4 | To understand the Geographical indications and Plant Variety Protection. | | | | | | | | | | | | |
| Module | CourseContents | | | | Contact Hrs. | Mapped CO | | | | | | | |
| 1 | Introduction of intellectual property right (IPR): Meaning, nature and basic concepts of intellectual property, Types of Intellectual Property Rights: Patent, Copyright, Trade Mark, Design, Geographical Indication, Plant Varieties and Layout Design, IPR in India: Genesis and development, IPR in abroad, Introduction to TRIPS and WTO, Introduction to IT Act. | | | | | | | | | | | | |
| 2 | PATENT: Objectives, Rights, Patent Acts 1970 and its amendments. Procedure of obtaining patents, working of patent, Industrial Application: Non-Patentable Subject Matter, Registration Procedure, Rights and duties of Patentees, Infringement, Restoration of lapsed Patents, Surrender and Revocation of Patents; Copyright: Definition &Types of Copyright, Registration procedure, Assignment & license, Terms of Copyright, Piracy, Infringement, Remedies, Copyrights with special reference to software. | | | | | | | | | | | | |
| 3 | Trademarks: Concept of Trademarks, brand names, logos, signatures, symbol certification marks and service marks and service marks. Registration of Trademarks assignment and licensing of marks trademarks and licensing of marks trademarks. Penalties - Trademarks aboard; Design: meaning and concept procedure for registration, effect of registration. | 15 | CO3 | | | | | | | | | | |
| 4 | Geographical indication: Concept of registration, effect of registration and ter Variety Protection: Concept of Plan Procedure for registration, effect of reprotection. India's New National IP Politowards Promoting IPR, Govt. Schem Opportunities in IPR. | Plant ction, m of step | 15 | CO4 | | | | | | | | | |
